

Braxton County Schools

Security Camera Installation

Walk through Questions

&

Clarifying Answers

November 28, 2017

Vendor Questions		Answers
1	Is there a floor plan that vendors can use?	Yes, the attached floor plan was provided and utilized during the walk through.
2	Are there hot spots of concern?	Yes, those were visited and discussed first. The major areas of concerns are the gymnasium, commons and eating area of the cafeteria. Line issues with POS was not an area of concern, because an adult staff operator enters student numbers daily.
3	Do we need to include switches in the bid specifications?	Yes, on p. 2 of the RFP...the following is stated: The installation will need to include wiring, networking, aiming, and configuration of all cameras as well as all other devices or equipment required for the system to include display monitor(s), switches, wiring, and NVR and/or server for data storage.

4	Does the school system want system isolation for the security system?	Yes, the school system would like a NAT configuration established for the security system.
5	Is there space in the network room for the system?	A rack location was identified for both vendors
6	What are the expectations for the gym?	We would like quality of video, but have a limited budget. So facial recognition upon entrance to the gym with ID identification once in the gym.
7	Where do you want the recording device?	The recording device can be placed in the server room with ability to access it from the principal's office and the BOE.
8	What types of warranty opinions does the county expect?	Please include the cost of a 3 year warranty and a 5 year warranty. We would like annual maintenance and training for the system. We would also like the manufacturer's warranty extended to the school system. We would also like manuals for the system.
9	How high can cameras be mounted in the commons?	They can be mounted to the midway point of the surrounding areas above the commons.
10	What areas do we need covered in the welding classroom?	We need coverage of the overhead door both inside and outside. The cameras should have general identification capability.
11	What coverage is needed in the building	General overview with tool room coverage...we would also like the garage door both inside and outside coverage

	construction room?	
12.	What is the expectations of stairwells?	In the main stairwell in Bottom B, we need coverage for the stairway in general and cover for the small space that provides the hiding space for students.
13	What are the hallway coverage expectations?	Crossfire effect with identification quality video footage
14	What is the main spot of concern in Bottom B?	The vocational area where multiple classroom are dismissing can create areas of concern because of the heavy traffic.
15	Do we want cameras in the computer labs?	Yes, we would like cameras in the computer labs with the ability to create no coverage areas or dead zones.
16	What is the term that we would like to retain video footage?	We would like 30 days of video footage. We would like all cameras to be motion activated and at least 10 frames per second.
17	Where are the other IDFs?	Top floor B and C
18	What are coverage expectations for the athletic complex?	Entrance and exit identification with camera coverage in the weight room
19	What are viewing expectations for the staff?	The principal should have live/active viewing capabilities with others having the ability to review recorded video.
20	Is there fiber that can be used if needed?	Yes, there is some dark fiber that can be used. The RFP states on p.2: The installation will need to include any electrical work to ensure the signal is properly relaying the signal back to the storage device. The installation will need to include wiring, networking, aiming, and configuration of all cameras as well as all other devices or equipment required for the system to

		include display monitor(s), switches, wiring, and NVR and/or server for data storage.
Questions from Vendor Demonstration		
1	Are there expectations for outside coverage?	Outdoor coverage was discussed during the walk through and it is outline in the RFP. The RFP states on p. 2: The district is requiring video cameras to be installed in strategic locations around the exterior to capture the perimeter of the high school facilities with a focus on school entrance points.

Note: Additional vendor question submitted following the format of the RFP on or before the deadline of December 15th will be added by January 12th.
